

F5 Accessories

A Host of FIELD-READY ACCESSORIES

Take your Motion® F5 Rugged Tablet PC's productivity to the next level with Motion's customized accessories - improving your workflow through comfort, mobility and connectivity.

ClipCarry

This ergonomic carrying solution clasps securely onto the back of the tablet to provide alternate methods for carrying and holding the device when in use.

Docking Station

The full-featured, mountable, desktop docking station, includes a battery charging bay for keeping batteries charged and ready.

Additional Battery

An additional battery is the perfect companion when working for extended periods of time away from a power outlet. The LED power meter eliminates guessing.

Mobile Dock

With the Mobile Dock mounting/docking solution, the Motion F5 can be mounted in almost any location. Offering full port replication and charging capability, the powered dock is perfect for field connectivity. Now available with locking mechanism providing added security.

Auto/Air Power Adapter

Provide power to your F5 no matter where your job takes you. An integrated USB port charges other devices such as cell phones, PDAs, digital cameras and more.

Battery Charger

The battery charger for the Motion F5 is an external bay to charge additional batteries, giving the capability of a full day of performance. The charger's LED indicates battery charge status.

*Additional battery sold separately

EasyConnect

This lightweight add-on provides one USB 2.0 port and one Ethernet 10/100 port allowing for easy connectivity without compromising the F5's sealed design.

EasyConnect Magnetic Stripe Reader

The snap-on module allows for secure credit card transactions at the point-of-sale, without bulky hardware to carry.

Mounting Solutions

Mount your F5 to adapt to a broad range of working environments. Save desk space while maintaining the mobility your F5 provides.

ReadyDock™ F5E

Convenient charging and storage dock made specifically to house, charge and secure your Motion F5 Tablet PCs. Now available with Ethernet for improved IT manageability.
